

## To do List Application

This is a simple to do list application

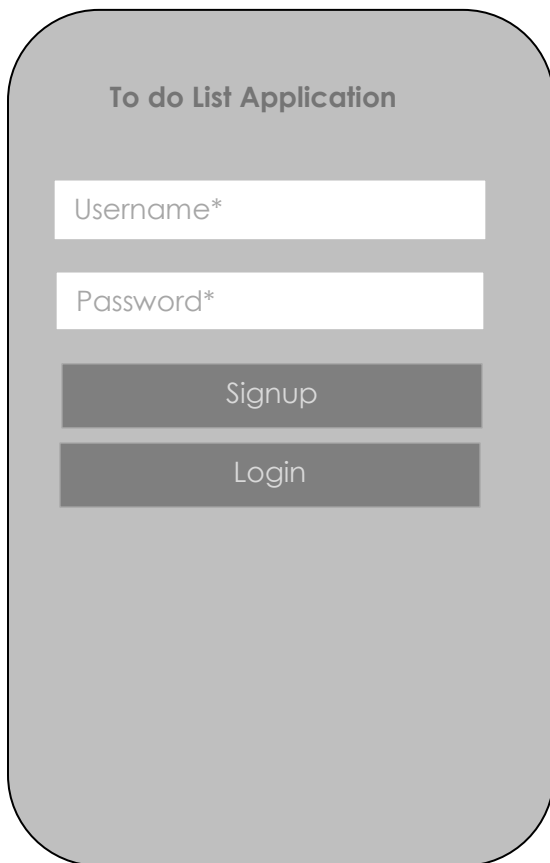

The purpose of this application is for the user to be able to create a to do item list.

The user can login on the onboarding screen by entering the username and password then click the login button which will take them to the home screen where they will be able to create and add items in the to do list. The add button adds the items on the list and the logout button takes them back to the onboarding screen.

The user can add items in the list, delete and mark the items done by checking the items.

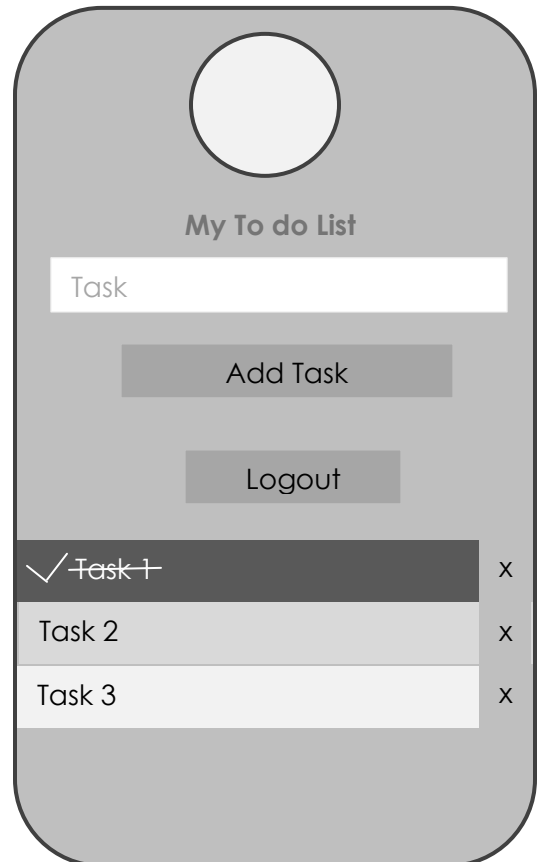

## Wireframes

**Onboarding Screen**

The Onboarding Screen wireframe is a vertical rectangle with rounded corners. At the top, it has the title "To do List Application". Below the title are two input fields: "Username\*" and "Password\*". Under the password field are two buttons: "Signup" and "Login".

**Home Screen**

The Home Screen wireframe is a vertical rectangle with rounded corners. At the top, there is a circular profile picture placeholder. Below it is the title "My To do List". Under the title is a text input field labeled "Task". Below the input field are two buttons: "Add Task" and "Logout". At the bottom is a list of tasks. The first task is "Task 1" with a checkmark icon on the left and a delete icon (an 'x') on the right. The second task is "Task 2" with a delete icon on the right. The third task is "Task 3" with a delete icon on the right.
